ON THE MAC

F-keys need fn unless “Use F1, F2, etc. keys as standard function keys” is on in Keyboard settings.

macOS keeps ⌘Space, ⌘→|, ⌘`, ^←, ^→ and ^F1 ... ^F8.

Click a symbol with ⌘ to open its declaration; Esc always returns to the editor.

Find Action ⇧⌘P *or* F1 lists every command with its shortcut; Keymap edits them.
